Important Information About DMG DASH®

Please note that DMG DASH fixtures may only be used with mounting accessories that have a ¼"-20 male thread with a maximum length of ¼-inch (7mm). This is the depth of the three ¼"-20 receivers on the fixture and the length of the Magnetic Mount and Light Stand Mount accessories included in the DMG DASH® Pocket LED Kit.

Third-party accessories greater than ¼-inch (7mm) in length are at risk of piercing the cavity of the fixture, which could lead to a fire hazard if the Lithium-ion battery inside the fixture is perforated. The improper use of third-party accessories will also invalidate the DMG DASH warranty.

If you have any additional questions or concerns, please contact TechSupport@rosco.com
